DESIGNED TO BE STRONG, LIGHT WEIGHT AND TO PROVIDE AN EVEN SPREAD DISTRIBUTION THE GROUND-EFFECT SPREADING BUCKET WILL ENSURE THAT YOUR INVESTMENT WILL PROVIDE MAXIMUM RETURN

### Filter screen

A removable item that filters out lumps from entering the spinner.

### Hopper level indicator

Providing an indication that the spinner is still rotating at a constant speed.

### Trickle feed auger

Used to apply a constant narrow line of product. Has variable speed control for different application rates.

### Product agitator

Maximizes product flow to the spinner and reduces product bridging in hopper.

### Collapsible hopper

Designed for applications where weight and space are essential.

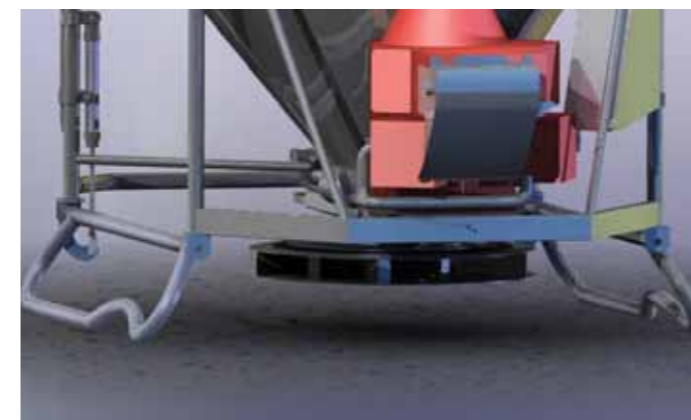

### Standard application rate bucket

Application rates of up to 260lbs per acre (290kgs/hectare)

### Heavy application rate bucket

Where application rates of up to 446lbs per acre (500kgs/hectare) are required in one flight pass

### Retractable legs

Legs that fold out of the way where applications require no obstructions in the path of the product being spread.

### Bucket mounted compressor

Used where bleed air from the aircraft is not available and compressed air is the preferred energy source for the slide valve operation.
